O'MINERAL

- les soins au naturels -

O'MINERAL was created to promote, within thermal centers, active ingredients from plant and mineral world !

WHO ARE WE ?

100 % Made in France

Our two factories are located in Brittany, France.

Strong CSR commitment

A commitment rewarded with the Ecodavis silver medal.

Standards & labels

Our know-how is recognized and certified by many labels :

- ISO 22716 (GMP)
- HOME COMPOST
- TUV Certification
- COSMOS ORGANIC
- VEGAN

About us

We are a French company pioneer in powder blends for french and european cosmetic brands.

All our productions are certified by a pharmaceutical control organisation (ANSM) and use natural active ingredients in an optimal concentration.

Our products

- ✓ Biodegradable care sheets, an alternative to plastic
- ✓ Bath infusions
- ✓ Poultices
- ✓ Self-heating thermal stones

BIODEGRADABLE CARE SHEETS

Ecological

100% biodegradable

Easy to use

These sheets made from biodegradable vegetable matter (potato starch) are a new ecological gesture of protection. These sheets provide an alternative to plastic and improve the comfort of the treatment while ensuring safety and total barrier protection.

THE + PRODUCT

Raw material from potato starch, GMO free.
Biodegradable care sheet from vegetable origin.

Products manufactured according to high standards: food and medical standards.

Matter HOME-COMPOST totally compostable (certified TUV).

100% french production and processing.

Technology proven on resistant films even at low thicknesses. Soft and pleasant touch.

FORMAT

To be determined according to your needs. Customizable from 200 rolls.

STORAGE

12 months protected from light and humidity in original packaging.
Temperature between 20 and 30° C.

BIODEGRADABLE CARE SHEETS

ASSURED BIODEGRADABILITY

| | |
|-----------------------------------|---------------------------------------------------------------------------------------------------|
| Definition | Potato starch-based material: Biodegradable and Bio-Compostable, in domestic compost. |
| Degradation time | Degradation in 12 weeks and bio-assimilable in 12 weeks. |
| Degradation conditions | Bacteria. |
| Advantages | Standards - Texture - Biocompostability. |
| Standards | NF T51-800 standard and TUV certified HOME COMPOST label (TA8021601694). |
| Revaluation of the product | Revaluation by industrial composting (NF EN 13432). Complete degradation in 6 months. |

BIODEGRADABLE CARE SHEETS

ENVIRONMENTAL COMPLIANCE

European Directive 94/62/EC of the European Parliament and of the Council of December 20, 1994 relating to packaging and packaging waste, amended by Directives 2004/12/EC and 2005/12/EC.

| STANDARD | ASSESSMENT REQUIREMENT | STATEMENT |
|------------------------------------------|------------------------------------------------------------------------------------------------------------|-----------|
| Prevention by reduction at source | Guarantee only a minimum quantity of adequate material in the packaging system (EN 13428). | YES |
| Dangerous substances | Guarantee compliance with EN 13428 (CR 13695-2). | YES |
| Heavy metals | Guarantee levels below the maximum authorized for components (CR 13695-1). | YES |
| Organic valorization | Guarantee compostability in all the terms of the standard for the functional unit of packaging (EN 13432). | YES |

POULTICES

Benefits of
thermal water

Temperature maintenance

Softness

Specially developed for applications in treatment cures, these poultices ensure the diffusion on the skin of the active ingredients contained in thermal water.

THE + PRODUCT

A clay selected for its high swelling properties: this clay is 100% sodium montmorillonite which has an exceptional capacity to retain water within its mineral structure. It is extracted from French or German quarry. This clay also has a high thermostatic power: the temperature is maintained throughout the duration of the treatment.

A non-woven poultice selected for 3 main characteristics:

- Maximum water content: permanent maintenance of thermal water on the surface of the skin.
- Upkeep of the clay within the poultice: to minimize handling constraints.
- A very soft touch which ensures great softness on the skin.

MANUFACTURE

These poultices are packaged in our factories in France according to cosmetic standards (ISO 22716). Our 2 sites are covered by the ANSM (pharmaceutical control authority).

BATH INFUSIONS

DETOX
Infusion

RELAXING
Infusion

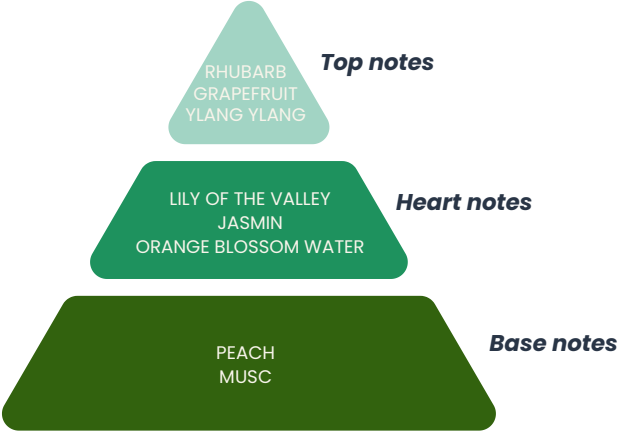

ENERGY
Infusion

A ceremony **vegetable, mineral** or **fruity** to help the organization to **recharge** and **get rid of his toxins**.

In contact with water, the active ingredients immediately release their benefits and diffuse their olfactory notes.

THE + PRODUCT - DETOX INFUSION

- **Cranberries powder** : particularly known for being a powerful anti-oxidant and for its purifying properties which make it a true ally in detox care.
- **Green tea leaves** : particularly known for being a powerful anti-oxidant and for its purifying properties which make it a true ally in detox care.
- **Butterfly pea flower extract** : anti-oxidants present in large quantities in the flower which make butterfly pea an active ingredient of choice for detox care.

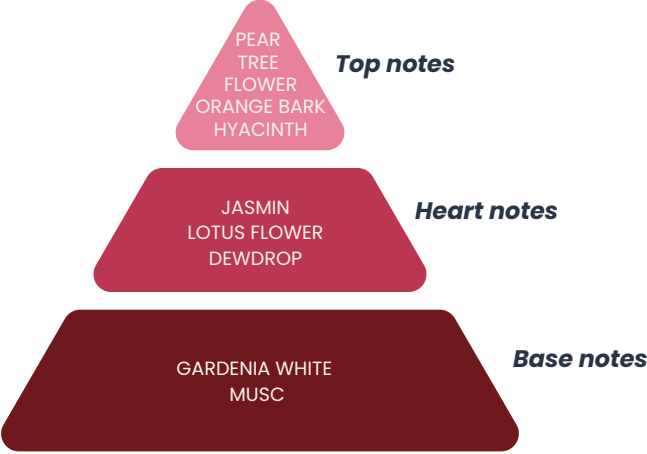

Mail : info@o-mineral.com

BATH INFUSIONS

THE + PRODUCT - RELAXING INFUSION

- **Rosa Centifolia petals** : this flower of 700 petals is traditionally called "flower of happiness" thanks to its naturally soothing action. It actively regulates the energies & harmonies of the internal organs. In contact with water, the petals regain their natural freshness.
- **Calendula flowers** : This plant is widely used in phytotherapy for its calming and softening properties. She regulates also nervous tension and hypertension.
- **Rooibos leaves** : this plant is very rich in antioxidants (polyphenols) which fight against oxidative stress. It is used in traditional medicine to combat sleep disorders.

THE + PRODUCT - ENERGY INFUSION

- **Sea water** : sea water is rich in mineral : ideal osmosis with the body (principle of isotonicity) and leaves on the skin the right dose of trace elements. Obtained by atomization (drying process), sea water retains its concentration mineral.
- **Glucose** : recognized as a humectant, glucose provides softness and suppleness to the skin.
- **Lactescent agent** : it transforms water into a real milky bath and immerses the whole body in a moment of pleasure & sweetness.

RITUAL OF BEAUTY

Fill the bathtub. Once your client is installed, place the sachet in the water. The sachet will infuse for the duration of the bath.

SELF-HEATING THERMAL STONES

Targeted massage

Wellness

Harmony of energies

A new gesture of care to rebalance and harmonize bodily energies. The pebbles are created from a mixture of powder and thermal water. **The naturally warming effect** stones release nervous tension and ensure a relaxing function throughout the duration of the treatment.

The use of thermal water reinforces the mineral effectiveness of this treatment.

THE + PRODUCT

Self-heating massage powder : in contact with thermal water, the stones are modeled and diffuse progressive heat.

After 10 minutes the stones harden and turn into smooth and non-sticky pebbles. They can then be used with a massage oil or cream as massage instruments.

RITUAL OF BEAUTY

To shape approximately 5 stones, mix a sachet with 200 g of lukewarm thermal water (30°C). Take the dough in your hands and shape into 5 cm thick pebbles.

Apply the stones directly to the skin.
